BARBIE'S BILL - MAKE ADVANCE CARE PLANS COUNT **Petition Purpose** That the House of Representatives implement a national register for standardised medical advance directives and mandate that those directives are followed.

Petition Reason I believe not following advance directives can lead to untold emotional and physical suffering. My mum had a directive refusing care should she suffer a serious loss of mental or physical capacity. However, after a stroke her directive was not followed and instead of a medicated death within 10 days, mum was kept alive requiring 24 / 7 care. This led her to refuse food and, finally, fluids and she died 58 days later, unmedicated until the last few days. I believe her advance care plan should have been followed.
